**AMAZING DISPLAY OF ALL NEW MOUNTING SOLUTIONS
AT PEERLESS' INFOCOMM BOOTH 5441**

--Mounts Closer to The Wall Than a Dime, Never-Before Seen Line of Articulating Beauties, An Incredibly Versatile Short Throw Projector Line and the Future of Projector Mount Adapter Plate Technology All in One Booth --

CHICAGO, IL – InfoComm 2009 – It's a new day and Peerless is greeting it head-on as the only mount manufacturer to debut all new, innovative audio/visual mounting solutions and accessories at InfoComm 2009, Booth 5441. The leading mount manufacturer will highlight an incomparable assortment of all new mounting solutions including Slimline – ultra-slim flat, tilt and articulating wall mounts, stunning universal articulating arms, the most versatile short-throw projector mount series, the future of projector adapter plate technology and much more. See these cutting edge solutions and explore unique mounting possibilities with Peerless' custom solutions at the Peerless Booth 5441.

All New Forward Thinking Solutions at Booth 5441

Peerless has upped the ante, bringing flat panel TVs closer to the wall than ever before with three styles of ultra-thin wall mounts: flat wall mounts that are closer to the wall than the width of a dime, tilt wall mounts that provide ultra-slim aesthetics while showcasing a new tilt mechanism that supports both positive and negative tilt that holds the screen off the wall for easy installation and a category first – ultra-thin articulating wall mounts that rest at least 1" (25 mm) from the wall and extend all the way to 28" (711 mm). This is just a start to the forward thinking being showcased!

Screen positioning has never been easier and done in such style than with Peerless' new Universal Articulating Arms. These innovative beauties rest close to the wall, provide a smooth extension, pivot from side-to-side with the touch of a finger for the optimal viewing experience. With an open wall plate design and built-in cable management, installation has never been easier. Adding to their splendor, these great-looking mounts deliver a uniform look from the smallest to the largest articulating arm. This must see line will impress!

Check out the future of projector mounting... Peerless' new patent-pending Spider[®] Universal

Projector Adapter Plate, the industry's first clamp-style universal projector mount adapter plate, which gives 360 degrees of unrestricted leg movement, making installation and attachment a breeze on projectors up to 75 pounds. Try this forward-thinking design at Booth 5441 and see what the future of projector mounting holds.

Peerless' newest Short Throw Projector mounts will make an impression. The Universal Short Throw Projector mounts are the only products that cover all short throw and ultra-short throw projector ranges. The mounts cover distances as far as four and one half feet to distances nearly flush to the wall, and, thanks to new capabilities and features, post-installation adjustments and projector alignment is a snap. These new mounts will make an impact on the install of any ultra-short or short throw projector.

Custom Innovations and Capabilities

Stop by Booth 5441 to check out the debut of Peerless' latest standard line of application specific mounting solutions, including our newest mounts for digital signage, education and hospitality applications. Explore Peerless' innovative standard line of application specific products, such as the new, installation time reducing menu board mount, versatile stretch screen mount and component storage solutions for A/V accessories, along with on-site experts available for project consultation. Peerless Custom Mounting Solutions solves both simple and the most complex audio/visual placement needs for any project.

Peerless will also be hosting 'How to Select the Best Mount to Get the Most Value for Any Installation' at their training session, scheduled for Thursday, June 18, from 2:30 pm to 4:00 pm. For more details, visit
