**IN-WALL MOUNT DELIVERS ARTICULATING FUNCTIONALITY OR A VIRTUALLY NO-PROFILE LOOK**

**CHICAGO, IL – InfoComm 2008** – Peerless Industries, Inc., presents a mounting solution that delivers a virtually no-profile look while allowing the option of articulating functionality all in one easy-to-use and install mount. Peerless’ new In-Wall Mounts will be shown at InfoComm 2008 in booth N5115, Las Vegas, Nevada June 18-20, 2008.

**Enhanced Installation Features and Built In Cable Management**

Peerless’ In-Wall mounts easily install between 16-inch wood stud centers by incorporating innovative stud-locating tabs that adjust ¼ inch to accommodate irregular stud spacing, allowing a simple one person installation for up to 60-inch screens. Removable plates with built-in electrical outlet receptacles and cable access knockouts make running cords and electrical a simple task. When mounted, these flat panel screens can rest flat against the wall or extend up to 19 inches to allow viewing from virtually anywhere in the room. These In-Wall mounts are also UL listed for safety, and when placed flush against the wall they may allow installations to meet American Disabilities Act (ADA) requirements.

**Multiple Models Cover Virtually All Popular LCD Or Plasma Flat Panel Screen Sizes**

The IM760 In-Wall models accommodates screens from 32 inches up to an impressive 71 inches and holds them virtually flat against the wall, while enabling articulating functionality. The IM740 In-Wall mount supports smaller screens ranging in size from 22 inches to 40 inches, and comes standard with a SA740P Articulating Arm Wall Mount. Both deliver the optimal solution for applications that require both articulating functionality as well as the ability to create a virtually no-profile look by simply adjusting the mount.

### **Pricing and Availability**

The new In-Wall mounts are currently available in black and silver, and range in price from \$389 to \$669. Peerless will be showing the new In-Wall mounts (IM760PU) and (IM740) as well as other mounting solutions at InfoComm 2008 in booth N5115 Las Vegas, Nevada June 18-20, 2008.
