**PEERLESS INDUSTRIES INTRODUCES VALUE-PRICED ARTICULATING  
WALL ARM FOR PROFESSIONAL AND HOME APPLICATIONS**

**CHICAGO, IL – November 21, 2005** – Peerless Industries, Inc., the industry leader in audio/visual mounting solutions, today introduced the **LCS-KLA LCD Flat Panel Articulating Wall Arm**, a new value-priced mounting solution for 10”-22” LCD screens used in both professional and home environments.

“The LCS-KLA arm is ideal for professional LCD monitor applications that require retractable extension from the wall and easy movement of the screen’s position– like office or industrial settings” said Michael Jasinski, associate product manager for Peerless Industries. “This new mount is also an affordable add-on for consumers who purchase an LCD screen as a holiday gift, greatly increasing the value and utility of their purchase without hurting their pocketbook.”

Extremely flexible and weighing a mere two pounds, the LCS-KLA features a sturdy two-link arm that can extend from the wall up to 15.25” then fold flat to a slim 2” depth. To ensure optimal screen positioning and an extensive range of viewing angles, the new mount features an adjustable three-hinge pivot system with tension control, a one-touch tilting mechanism that ranges +/- 35 degrees and up to 180 degrees of swivel.

The LCS-KLA mount includes a VESA<sup>®</sup> 75/100 mounting plate for compatibility with almost any 10”-22” LCD screen. It comes pre-assembled out of the box with all the necessary hardware to allow quick set-up and easy installation. Featuring a scratch-resistant fused epoxy finish for durability in a wide range of applications, the LCS-KLA is available in silver to complement both the screen and the room.
