**Style and Functionality Merge in the First Ever International Appearance of the
Thinnest Mounting Solutions in the World at Peerless' Booth 4Q68 at ISE**

*-- Peerless' New Slimline™ Ultra-Thin Flat, Tilt and Articulating Wall Mounts Provide
the World's Thinnest Mounts for Ultra-Thin Flat Panel Screens --*

CHICAGO, IL – ISE 2009 -- February 3, 2009 – Peerless Industries, Inc., the leader in professional-grade audio/visual mounting solutions, unveiled the world's first full line of ultra-thin wall mounts at ISE 2009. The new ultra-thin products include the absolute thinnest flat wall mount, tilt wall mount and the industry's first and only ultra-thin articulating arm wall mounts in its category. Experience the merge of style and function only at Peerless' stand number 4Q68 at ISE in Amsterdam, February 3-5, 2009.

“Peerless is committed to maintaining the lowest-profile mounts in the industry,” said Adam Molberger, product manager, Peerless Industries, Inc. “We introduced the first ultra-thin universal flat wall mounts in 2008. This year, we're not only introducing the thinnest mount ever developed, we also have the only tilting wall mount that offers 15 degrees positive and negative tilt and the first in its category ultra-low profile articulating mount.”

The Universe's Ultimate Ultra-thin Flat Wall Mount

Supporting the screen an unprecedented 0.84 cm (0.33 inches) from the wall, Peerless'

new universal ultra-thin flat wall mount is unseen behind the mounted flat panel. “A thinner mount simply doesn’t exist,” said Molberger. “The new Slimline Ultra-thin Flat Wall Mount virtually disappears behind the ultra-thin flat panel screen, adding a sleek, clean, modern elegance to any application,” he continued.

Style and Functionality Taken to the Next Level

Peerless’ new Slimline™ Tilt Wall Mount supports ultra-thin flat panels a slim 1.6 cm (0.62 inches) from the wall while offering unmatched tilt functionality to achieve the perfect viewing position. The tilt mounts continuous angle adjustment offers 15-degree negative tilt for access and 15-degree positive tilt for perfect viewing. The tilt mount is also distinguished by its installer-friendly design – the mount can fold out from the wall up to 12.7 cm (5 inches), allowing the installer to use both hands during installation and maintenance.

Ultimate Expression in Elegance, Weightlessness, and Flexible Viewing

Peerless introduced a pioneer into the ultra-thin mount category with its ultra-thin articulating arms that hug the screen less than 2.5 cm (1-inch) from the wall in the retracted position, while offering full extension, pivot and tilt functionality. This breakthrough design transforms the latest ultra-thin flat panels into astounding, admirable works of art.

Pricing and Availability

Slimline™ Ultra-thin Wall Mount Line will be available in a variety of models to accommodate various screen sizes. Ship dates and pricing are to be announced. Visit Peerless at ISE 2009 to experience breakthrough innovations in the ultra-thin flat panel TV mounting category and other creative mounting solutions in Peerless’ Stand #4Q68, ISE, Amsterdam, February 3-5.

About Peerless Industries, Inc.

Peerless has designed and manufactured the most comprehensive line of audio/visual mounting solutions for over 40 years. Today, Peerless designs and manufactures mounts

for current and emerging visual display technologies, including LCD and plasma flat panel displays, projectors, CRT televisions and other electronic equipment used in the commercial and consumer markets.
