**PEERLESS' NEW ONEMOUNT™ FLAT PANEL MODULAR WALL MOUNT SERVES
SCREENS FROM 23 INCHES TO 84 INCHES**

-- One Model, One Box, One Solution, OneMount --

CHICAGO, IL –November 1, 2006 – Peerless Industries, Inc., the industry leader in professional-grade audio/visual mounting solutions, today introduced its new OneMount™ Flat Panel Modular Wall Mount (ONE-TP models) for LCD and plasma screens, designed to provide residential installers one product that accommodates screens from 23-inches all the way to 84-inches. The mount's inclusive size range, versatile functionality and modular design are ideal for both, residential and commercial applications.

“OneMount is an exciting, versatile new solution that works with practically any screen at any installation site,” said Derrick Lam, director of Mounting Solutions for Peerless Industries. “It features screen range versatility, portrait and landscape mounting, standard and security hardware...this product is the Swiss-army knife of mounts.”

Flexible, Versatile, Modular

Peerless' new OneMount™ Flat Panel Modular Wall Mount's (ONE-TP) patent-pending design provides a single solution that accommodates flat panel screens from 23 inches to 84 inches and is UL® listed to hold up to 250 pounds. It is comprised of three interlocking wall plates that can be used in one, two or three plate configurations, depending on screen size. Mount assembly is expedited with the center wall plate's built-in screw design. Simply attach the interlocking side wall plate(s) to the center wall plate and secure with two or four flange nuts. The adapter brackets extend to accommodate the screen. Just loosen two screws on each bracket and extend the brackets to fit any mounting hole pattern. The design of the adapter brackets even allows for portrait mounting of flat panel screens up to most 50 inches, which is great for digital signage applications.

Easy-Grip Lever, Centralized Screen Placement and Security/Safety Features

The OneMount™ Flat Panel Modular Wall Mount incorporates a wide range of viewing angles with a continuous, one-touch tilt mechanism which provides up to +15/-5 degrees of tilt. In the negative tilt position, over 4” of clearance gives clear access behind the screen for cord management. If tilt needs to be locked into place, the easy-grip tension adjustment handle allows firm tension to be applied, eliminating the need for readjustment.

“This product is so versatile,” said Lam, “even the wall studs don’t have to be centered for the screen to be perfectly placed.” The mount features a continuous rail design that enables screen positioning across the entire length of the mount, making side-to-side adjustment easy for ideal screen positioning or centered wall placement.”

As an added feature, optional security hardware is included to guard one of the most expensive A/V components, the TV. The security feature also acts as a safety mechanism, preventing the screen from accidentally being bumped off the wall, protecting the screen and ensuring safety for the end user.

Availability and Pricing

Peerless’ new OneMount™ Flat Panel Modular Wall Mount (ONE-TP) will be available November 1st at a list price of \$250. For more information about Peerless’ professional-grade mounting solutions, visit www.peerlessmounts.com or call (800) 865-2112.
