**PEERLESS' NEW ONEMOUNT™ FLAT PANEL MODULAR WALL MOUNT SERVES
SCREENS FROM 23 INCHES TO 84 INCHES**

-- Easy to Specify and Simple to Order Mounting Solution for Wall Applications --

CHICAGO, IL – AIA 2007 – Peerless Industries, Inc., the industry leader in professional-grade audio/visual mounting solutions, will be showing its new OneMount™ Flat Panel Modular Wall Mount (ONE-TP models) for LCD and plasma screens, designed to provide one product that accommodates screens from 23-inches all the way to 84-inches in the Peerless booth #9064 at AIA, May 3 -5, 2007, San Antonio, TX. The mount's inclusive size range, versatile functionality and modular design are ideal for both residential and commercial applications.

“The OneMount was developed to simplify ordering and product selection for architects and specifiers,” said Lisa Clark, product manager, Peerless Industries, Inc. “This product saves valuable research time by providing one mounting solution to specify that will fit a wide range of flat panel screen sizes, makes and models.”

Flexible, Versatile, Modular

Peerless' new OneMount™ Flat Panel Modular Wall Mount's (ONE-TP) patent-pending design provides a single solution that accommodates flat panel screens from 23 inches to 84 inches and is UL® listed to hold up to 250 pounds. It is comprised of three interlocking wall plates that can be used in one-, two- or three-plate configurations, depending on screen size. Mount assembly is expedited with the center wall plate's built-in screw design. Simply attach the interlocking side wall plate(s) to the center wall plate and secure with two or four flange nuts. The adapter brackets also extend to accommodate the screen. Just loosen two screws on each bracket and adjust the brackets to fit any mounting hole pattern. The design of the adapter brackets even allows for portrait mounting of flat panel screens up to 50 inches, which is great for digital signage applications.

Easy-Grip Lever, Centralized Screen Placement and Security/Safety Features

The OneMount™ Flat Panel Modular Wall Mount incorporates a wide range of viewing angles with a continuous, one-touch tilt mechanism which provides up to +15/-5 degrees of tilt. In the negative tilt position, over 4” of clearance gives ample access behind the screen for cord management. If tilt needs to be locked into place, the easy-grip adjustment handle allows firm tension to be applied, eliminating the need for readjustment.

Versatility and Security

The mount’s continuous rail design enables screen positioning across the entire length of the rail, making side-to-side adjustment easy for ideal screen placement or centered on the wall positioning. This product is so versatile the screen will be perfectly positioned even if the wall studs are not. As an added feature, optional security hardware is included to guard one of the most expensive A/V components, the TV. The security feature also acts as a safety mechanism, preventing the screen from accidentally being bumped off the wall, protecting the screen and ensuring safety for the end user.

Availability and Pricing

Peerless’ new OneMount™ Flat Panel Modular Wall Mount (ONE-TP) is available at a list price of \$250. For more information about Peerless’ professional-grade mounting solutions, visit booth #9064 at AIA, May 3 -5, 2007, San Antonio, TX., www.peerlessmounts.com or call (800) 865-8010.

About Peerless Industries, Inc.

Peerless has designed and manufactured the most comprehensive line of audio/visual mounting solutions for over 40 years. Today, Peerless designs and manufactures mounts for current and emerging visual display technologies, including LCD and plasma flat panel displays, projectors, CRT televisions and other electronic equipment used in the commercial and consumer markets. Built on decades of experience and proven expertise, Peerless Industries is ISO 9001 certified and is an approved Underwriters Laboratories testing site.
