**NEW OUTDOOR ENVIRONMENTAL ENCLOSURES FROM PEERLESS INDUSTRIES
PROTECT FLAT PANEL SCREENS FROM WEATHER, THEFT AND DAMAGE**

CHICAGO, IL –September 14, 2006 – Peerless Industries, Inc., the industry leader in professional-grade audio/visual mounting solutions, today introduced its new line of Outdoor Flat Panel Environmental Enclosures (EEO models) for 32 inch, 40/42 inch and 50 inch LCD and plasma screens. The enclosures are ideal for locations that require year-round weather-resistant and secure mounting solution. The comprehensive capabilities of the enclosures are designed to match the needs of the environment that include protection for the screen from temperature extremes, rain, sleet, snow and dust while incorporating stringent security features to deter theft.

The new Outdoor Flat Panel Environmental Enclosures will be shown in the Peerless booth, number 623, at CEDIA 2006 in Denver, Sept. 14-17.

"We're seeing more and more plasma and LCD screens being used in outdoor commercial and residential applications," said Derrik Lam, Director, mounting solutions business unit. "Facilities such as stadiums, outdoor malls and theme parks are using this technology for digital signage, while home owners are installing them by the pool or in the patio area. The outdoor enclosures are an excellent way to enjoy the year-round benefits of outdoor screens without damage or theft."

Climate-Controlled and Fully-Protected Outdoor Flat Panel Screen Enclosure

The new Outdoor Flat Panel Environmental Enclosures are equipped with a dual filter fan system that helps keep the screen operating at the proper working temperature, and can help keep it free of dust and dirt. The optional thermostat-controlled heating and AC cooling units maintain proper screen

operating conditions in virtually any climate and available anti-reflective glass provides glare-free viewing. The screen is fully-protected within the enclosure to deter theft, accidental damage or vandalism and eliminates the need for seasonal screen removal, storage space and possible screen damage during the removal process.

Easy Installation and Maintenance

The Outdoor Environmental Enclosure is a lockable and secure mounting solution that offers multiple mounting options from wall or ceiling placement to pedestal-set, depending on installation requirements. The front cover is supported by gas struts that enable quick and effortless screen installation and easy maintenance by one person.

Availability and Pricing

The new Outdoor Flat Panel Environmental Enclosures (EEO models) for 32 inch, 40/42 inch, 50 inch and other flat panel sizes are targeted for release late fourth quarter. Pricing is based on specific application needs. For more information and availability contact Peerless at (800) 865-2112 or visit www.peerlessmounts.com.

About Peerless Industries, Inc.

Peerless has designed and manufactured the most comprehensive line of audio/visual mounting solutions for over 40 years.
