## **Peerless Introduces Line of Affordable Standard Mounting Solutions for Digital Signage Applications**

*Proven Products Designed Exclusively for Commercial Signage; Top Quality Mounts Satisfy Most Popular Location Requirements, Lowering Acquisition/Install Costs*

LAS VEGAS (June 9, 2010) – Digital signage installs are now easier and less expensive with Peerless Industries’ new line of standardized mounting solutions. The line of six products, announced today at InfoComm 2010 in Las Vegas, cover virtually all of the most common installation scenarios, saving signage owners significant time and cost over custom-designed alternatives.

### **Universal Solutions for Multiple Applications**

Peerless’ new standardized mounts eliminate the time-consuming process of designing, manufacturing and delivering custom products for each installation. Using the most popular install designs, Peerless now offers a series of field-tested products that serve in multiple locations:

- **DS-VW760 Full-Service Video Wall Mount for 40” to 65” Displays.** Enabling full access to individual displays in a video wall, the DS-VW760 features an innovative pull-out/prop-open hinge mechanism that provides quick and easy rear-of-screen access, with eight tool less adjustment points for fine tuning.
- **DS508 Flat/Tilt Wall Mount with Media Device Storage for 27” to 60” Flat Panel Screens.** Excellent dual-purpose solution providing housing and access for media controllers, computers and graphics drivers, as well as security features to protect equipment from theft or vandalism.
- **DS509 Slim Tilt Mount with PC Holder for 25” to 60” Flat Panel Displays.** Low-profile design accommodates smaller computers. As with the DS508, the DS509 offers VESA compliance and is compatible with the Peerless PLP adapter plate technology to accommodate any flat panel display.
- **DSX750 Media Player Holder Accessory for 32” to 60” Displays.** Compatible with a number of Peerless swivel and articulating wall mounts, the DSX750 houses a media player securely and inconspicuously behind the display unit. Offers built-in cable management and prop-open service access.

- **DST360 Flat/Tile Universal Wall or Ceiling Mount with Computer/Media Controller Storage.** A “single box” solution for both display and computer or media controller in either wall- or ceiling-mount situations. Allows access to media device without having to remove the display. Ceiling mount offers built-in 360-degree swivel.
- **DSX200 Shelf Bracket for Media Players Up to 18”W x 15”D.** Open shelf bracket attaches to a wide selection of Peerless standard wall mounts, carts or floor stands. Supports various types of media devices either above or below the digital display and manages media device cables while providing easy access.

### **Designed for Signage Industry**

With security, durability and strength as primary considerations, Peerless’ standardized display mounts are designed specifically for commercial use. Each design accommodates specific commercial needs such as media device mounting and easy service accessibility. All products have been field tested to ensure long-term performance in actual use.

### **Faster Shipping**

Because mounts in the standardized line are readily available, customers can expect delivery in a fraction of the time required for custom alternatives. Enables installers to complete more installations faster.

### **Lower Installation Costs**

Standard mounts mean more routine installs, lowering time and cost. Universal brackets can be used in a variety of locations and under multiple conditions.

### **Availability**

The Peerless line of Standard Mounting Solutions can be viewed on the Peerless website in the digital signage section, as well as in the company’s summer/fall 2010 full line catalog. For more information, visit the Peerless Industries exhibit at Booth C5842 at InfoComm 2010, opening today at the Las Vegas Convention Center.

### **About Peerless Industries, Inc.**
