**Peerless Develops Specialized Mount for Commercial Installation of
World's Largest 103-inch Plasma Display**

- Supports up to 500 Pounds, Features Incremental Tilt and Facilitates Easy Installation-

CHICAGO, IL – September 18, 2006 – Peerless Industries, Inc., the industry leader in professional-grade audio/visual mounting solutions, has developed a new, specially designed mount to support Panasonic's 103-inch, full HD TH-103PF9UK, the world's largest Plasma Display.

Peerless' new mount for Panasonic's 103-inch Plasma Display enables multiple viewing angles for reduced screen glare and the perfect screen viewing position. The mount is designed to expedite installation with its easy hook-on attachment brackets that are compatible with the screen's pre-installed spacers. The 103-inch mount incorporates a vertical adjustment feature that assists in attaining perfect placement of the screen on the wall. It has been UL-tested to four times its stated weight capacity of 500 pounds.

"Our new mount is designed to support the largest display available," said Maya Bojic, Director, Custom Solutions Business Unit. "The success of this project demonstrates Peerless' industry leadership in supplying mounting solutions for the latest technology."

"We commend Peerless Industries' ability to rapidly supply us with a custom mounting solution that offers flexible installation of the world's largest plasma display in applications ranging from the boardroom and lobby areas to video production and screenings," said Karl DeManss, Product Line Business Manager, Panasonic Broadcast.

For more information about Panasonic's first commercial installation of the 103-inch Plasma Display, visit www.panasonic.com/news.

Peerless' expert engineering team designs functional, safe, secure and reliable solutions for commercial and residential applications. For additional information on Peerless professions-grade custom mounting solutions contact the Custom Department at 800-865-2112 or visit www.peerlessmounts.com.
