## **Peerless-AV™ to Showcase Wireless Technology at CEDIA Expo**

*HD Flow™ Wireless Multimedia Kit and World's First-ever Wireless Mounts to be Demonstrated at the Leading Residential Electronics Tradeshow*

**Indianapolis, IN (August XX, 2011)**—Peerless-AV, the leader in innovative audio and video solutions, announced today it will showcase its new wireless entertainment solutions at the 2011 CEDIA Expo.

### **HD Flow Wireless Multimedia Kit**

The company's HD Flow Wireless Multimedia Kit is an 802.11n transmitter and receiver system that provides a simple plug-and-play solution that transmits HD signals to HDTVs, projectors, and other displays at distances of up to 131 feet, eliminating long cable runs and preventing the need for drilling holes into walls. With Full HD 1080p 60Hz and audio content streaming, the HD Flow kit provides zero-latency transmissions that can cover an entire home, including outdoor entertainment areas over its own private integrated Wi-Fi (802.11n) network that resists other active routers. This also allows content to be streamed to a total of four wireless HD receivers from a single wireless HD transmitter.

The HD Flow Wireless Multimedia Kit can stream content from up to four multimedia devices at one time, including satellite or cable set-top boxes, DVD and Blu-ray® players, PCs, and various video game consoles. The device offers more flexibility than competitive HDMI-connection only solutions with component, composite, PC-to-TV and LAN connectivity. The HD Flow Multimedia Kit is not line-of-sight, so signals easily transmit through walls and floors. Built-in IR allows the device to control other A/V devices located in other rooms or within cabinets.

### **HD 1080P Wireless Mounts**

Peerless-AV will also debut the world's first wireless mounting solutions, eliminating the hassle of cable management and making TV placement options nearly limitless. The new line of articulating mounts features models for in-home installation and environmental models for installation on patios, decks, pools and garages. The wireless mounts can receive Full HD 1080p 60Hz streaming AV from as far away as 131 feet from the media source. Built-in reverse IR allows operation of up to four CE devices from the TV, eliminating the need to purchase additional CE devices. This is the perfect solution for outdoor installations where long cable runs can be cost prohibitive. Inside the home, the wireless mounting solution eliminates the hassle of drilling and pulling AV cables, and adds to the décor by eliminating the management of cable bundles on the mount. With virtually no mess to clean up, this new wireless mount reduces time consuming installation tasks, which in turn maximizes the installer's profits.

"With HD Flow and the wireless mounts, we provide installers with a truly HD wireless AV solution

that allows them to offer their customers a seamless HD solution while also maximizing their profit potential,” said Mike Campagna, Peerless President and COO. “Peerless-AV’s wireless solutions bring a whole new level of HD connectivity to both inside and outside the home”

CEDIA Expo is the leading tradeshow for the residential electronic systems industry. It is a showcase for the latest home technologies in entertainment, efficiency, security and automation. For more information, visit [www.cedia.net](http://www.cedia.net).
