**Peerless-AV Introduces HD Flow Wireless Multimedia Kit for Installers;
Connects HD or Standard Displays & Multimedia Devices without Cabling**

Reduces Installation Costs; Reaches Up to 131-Feet with No Line of Sight Requirement

ORLANDO, FL – June 15, 2011 – Peerless-AV will show at InfoComm 2011 its HD Flow Wireless Multimedia Kit (HDS100), an 802.11n transmitter and receiver system that allows HDTVs, flat panels, projectors and other displays to be installed up to 131-feet away from multimedia source devices without wiring. The HD Flow's long-range, high-quality, Full HD 1080p 60Hz wireless media streaming provides complete flexibility in display placement, reduces installer costs, eliminates cable clutter and hole drilling, and provides instant real-time HD transmission – even through walls, floors and ceilings – with no latency.

At less than half the cost of similar systems, the \$419.99 (MSRP) HD Flow solution has a longer broadcasting reach, smaller footprint, widest IR frequency interoperability and more connectivity options than any competing product. It:

- **Allows displays to be placed in any preferred location** including spots such as restaurant patios, pool bars, sport fields, conference rooms, training facilities, lecture halls, classrooms, fireplaces, and many others - regardless of where related audio and video components are situated.
- **Streams Full HD1080p 60Hz or non-HD content and 5.1 channel Digital audio** from any multimedia device (satellite/DVR/cable set-top box, Blu-ray®/DVD player, video game console, laptop, PC, media server or VHS player) to any display (HDTV, pro display, monitor, projector or CRT) with virtually no delay.
- **Offers multiple connectivity options** including HDMI, component, composite, PC-to-TV and LAN, providing a key advantage over HDMI-only solutions.
- **No line-of-sight requirement**, allowing the transmitter to be concealed in a cabinet or AV closet. HD Flow is able to transmit through walls, ceilings and floors.
- **Built-in IR** allows for control of AV devices that may be located in another room, AV rack or AV closet.
- **Broadcasts to up to four displays from a single transmitter** (with additional receiver units) without the need of an additional wireless router. This simplifies the installation of multi-display/projector and multi-location/room installations,

utilizing its own integrated private Wi-Fi (802.11n) network that resists interference and network sharing with nearby wireless routers.

The HD Flow system can be used for installations in homes, conference rooms, training rooms, schools, digital signage, bars, restaurants, trade shows, places of worship and other facilities.

Other features include plug-and-play operation with no software or driver installation, the ability to connect up to four source devices simultaneously and easily switch between sources using the remote control unit or pushbutton on the HD Flow transmitter, and the option to switch to a second WiFi channel in the event of interference.

Availability

Each HD Flow Wireless Multimedia Kit includes an 802.11n transmitter and receiver with base stands, one remote control, one component-to-VGA adapter, one IR Blaster cable with three emitters, two power adapters, a user manual and an installation poster.

Peerless is the exclusive North American distributor of the HD Flow Wireless Multimedia Kit. The system is available immediately from Peerless-AV, local AV dealers, and AV distributors including: ADI, AVID, Best Buy for Business, Double O Electronics, Ingram Micro, Stampede, and Synnex. More information is available at www.hdflow.com.

About Peerless-AV

Peerless-AV, a Peerless Industries, Inc. company, is a leading designer, manufacturer and distributor of Made in the USA audio-visual solutions. Our innovative product line includes flat panel mounts, projector mounts, wireless technology, motorized solutions, A/V cables, kiosks, A/V furniture, A/V racks, precision gear products, surge protection, screen cleaning products and a full assortment of accessories. A 70-year-old global company, Peerless-AV has remained at the forefront of the industry, creating new A/V technologies that push the envelope and provide ideal solutions to meet the needs of the consumer and pro markets, alike. Peerless-AV manufactures over 3,600 products that serve original equipment manufacturers, commercial integrators and consumer retailers in 28 vertical markets worldwide through direct sales representatives and authorized distribution.
