PEERLESS UNVEILS WORLD'S THINNEST MOUNTS

-New Slimline® Mounts Install Screens Only 0.4 Inches From The Wall-

CHICAGO, IL – InfoComm 2008 – Peerless Industries, Inc., the industry leader in professional-grade audio/visual mounting solutions announced the launch of its groundbreaking engineering achievement, the Slimline® Ultra-Thin Universal Mounting Solutions. The world's thinnest mount at only 0.4 inches thin, these mounts bring a screen closer to the wall than any other product in the industry.

“We didn't just design a thinner bracket,” said Adam Molberger, product manager, Peerless Industries, Inc. “We designed the world's thinnest universal flat panel mounting system.”

Universal Ultra-Thin Mounts for Any Flat Panel TV On The Market

The new Slimline® Ultra-Thin Universal Mounts deliver a virtually no-profile installation that positions flat panel screens a mere 0.4 inches from the wall, and are so thin that they virtually disappear behind the screen. The mount's ultra-thin profile perfectly complements Hitachi's 1.5 inch ultra-thin TVs, but its universal design enables the Slimline mounts to accommodate any new ultra-slim TV on the horizon. And with up to 150 lb UL-tested load capacity, the Slimline mounts can even handle the weights of standard flat panel LCD and plasma TVs on the market today.

Quick And Easy Installation With Velcro® Brand Fastener System

These Slimline® Ultra-Thin Universal Mounts are also uniquely easy to install, thanks to their horizontal and vertical screen positioning adjustments, and a Velcro® Brand Fastener System for a fast and secure installation. Once the mount is installed, simply press the TV down to engage the Velcro Fastener System and rest assured knowing that it will not be accidentally moved from its set position.

A Fine Thin Line

Peerless' Slimline mounts include three universal sizes for TVs up to 60 inches. The line is complemented by an in-wall A/V accessory box to allow electrical outlets, cables and plugs, power conditioners, etc., to nest neatly behind the mount's 0.4 inch profile, completing a clean and clutter-free installation. For concrete, brick or other surfaces where internal cable management isn't an option, Peerless offers an on-the-wall cable management system and shelving units to hold A/V components.

Pricing and Availability

The Slimline mounts are now available in gloss black and range in price from \$129 to \$199. Visit Peerless to see the world's thinnest mounting solutions ever at InfoComm 2008 in booth number N5115, Las Vegas, Nevada, June 18-20th.

About Peerless Industries, Inc.

Peerless has designed and manufactured the most comprehensive line of audio/visual mounting solutions for over 40 years. Today, Peerless designs and manufactures mounts for current and emerging visual display technologies, including LCD and plasma flat panel displays, projectors, CRT televisions and other electronic equipment used in the commercial and consumer markets. Built on decades of experience and proven expertise, Peerless Industries is ISO 9001 certified and is an approved Underwriters Laboratories testing site.
