**NEW SMARTMOUNT® 600 SERIES: PEERLESS' FASTEST AND EASIEST TO INSTALL
WALL MOUNTING SOLUTIONS**

CHICAGO, IL – InfoComm 2008 – The new SmartMount® 600 Series Flat and Tilt Wall Mounts are an advanced innovation that utilizes a spacious open wall plate design to accommodate cables, cords and electrical gang-boxes. The wall mounts also incorporate a unique set of features that work seamlessly together, making them Peerless' fastest and easiest to install mounting solutions. Peerless will be showing this new series at InfoComm 2008 in booth N5115 from June 18-20, 2008 in Las Vegas, Nevada.

Fast, Easy, and Flexible Installation

The completely redesigned SmartMount® 600 Series Flat and Tilt Wall Mounts make mounting a flat panel screen faster and easier than ever. This Series sets the standard with its open wall plate architecture that delivers six inches of vertical space and up to 32.62 inches of horizontal space, removing 65 percent of the original wall plate design, to provide ample room for cables, cords and electrical gang boxes to be placed within the plate's perimeter to create a clean, finished appearance. Eight inches of horizontal adjustability account for unevenly spaced wall studs, so that the screen can be placed in the best spot without compromising the viewing angle. These features all work seamlessly together to deliver the fastest and easiest mounts to install.

New Series Offers Both Flat and Tilt Wall Mount Models

The new SmartMount 600 series offers a full line of both flat and tilt wall mount models to provide installation options and accommodate virtually any flat panel screen from 10 inches to 102 inches. Flat models mount the screen flush against the wall, but provide enough clearance for cables and cords to be routed through the open wall plate. Tilt wall mount models come equipped with a one-touch™ tilt mechanism that allows tilt adjustment with just the touch of a hand. They also include an IncreLock™ system that sets the screen in 5-degree increments to positively lock the angle into place.

Else simply turn the easy-grip ratcheting levers located on both sides of the mount to lock in any desired viewing angle.

Availability and Pricing

The SmartMount® 600 Series Flat and Tilt Wall Mounts are now available and range in price from \$35 to \$300. The new series will be shown in addition to Peerless' comprehensive selection of mounting solutions at InfoComm 2008 in booth N5115 from June 18-20, 2008.
