PEERLESS CELEBRATES ITS COMMITMENT TO PRODUCT SAFETY

-- 10 Years of Being Part of Underwriters Laboratories, Inc. Client Test Data Program --

CHICAGO, IL – October 2007 – Peerless Industries, Inc., the industry leader in professional-grade audio/visual mounting solutions celebrates 10 years of participation in the Client Test Data Program (CTDP) for Underwriters Laboratories Inc. (UL), an authority of the U.S. product safety system. The CTDP has enabled Peerless to maintain strict UL standards for product safety.

“We are proud to celebrate 10 years of being a part of the UL Client Test Data Program,” said Mike Campagna, president Peerless Industries, Inc. “We are devoted to keeping the highest safety standards. Peerless was the first mount manufacturer to have a UL approved test site in our manufacturing facility. We UL test both our standard and custom products ensuring a professional level of product safety and quality.”

Celebrating 10 Years of Commitment to Safety

For over a decade Peerless has successfully completed annual audits by UL engineers ensuring that Peerless conforms to the strict requirements of the certification program. On a quarterly basis, Peerless puts their products to the test and undergoes a UL audit to ensure product safety. UL standards ensure that every Peerless mount is safe and will support four times its listed load capacity for safe and secure installation into commercial and residential environments. Being a part of the Client Test Data Program (CTDP) for UL enables Peerless to test virtually all their products, even custom mounting solutions to applicable UL standards in-house.

Peerless’ Dedication to Developing New Standards for A/V Mount Safety

As a chair on UL’s Household Use Working Group for Standards Technical Panel (STP) and a member within the UL2442, Peerless is helping to develop the new UL2442 safety standard for A/V mounts. The new standard will ensure that the current standards developed for commercial use will translate to the consumer market. This new standard will protect the public from poorly designed and unsafe products.

About Underwriters Laboratories, Inc.

Underwriters Laboratories is an independent, not-for-profit product safety certification organization that has been testing products and writing Standards for Safety for over a century. UL evaluates more than 19,000 types of products, components, materials and systems annually with 21 billion UL Marks appearing on 71,000 manufacturers' products each year. UL's worldwide family of companies and network of service providers includes 66 laboratory, testing and certification facilities serving customers in 104 countries.

About Peerless Industries, Inc.

Peerless has designed and manufactured the most comprehensive line of audio/visual mounting solutions for over 40 years. Today, Peerless designs and manufactures mounts for current and emerging visual display technologies, including LCD and plasma flat panel displays, projectors, CRT televisions and other electronic equipment used in the commercial and consumer markets. Built on decades of experience and proven expertise, Peerless Industries is ISO 9001 certified and is an approved Underwriters Laboratories testing site.
