**VIDEO WALL MOUNTS ENABLE EASY CREATION OF MULTI SCREEN DISPLAYS**

**CHICAGO, IL – InfoComm 2008** – Peerless Industries, Inc., will be showing its innovative Video Wall Flat Screen Mounts (VWP-4050-B), (VW-4050-B) for screens ranging in size from 40” to 50” at InfoComm 2008. These impressive Video Wall Mounts enable an unlimited number of matrices to be easily created and maintained, and provide ample room to run cables and cords behind the display. To experience the Video Wall Flat Screen Mounts visit Peerless’ booth N5115 at InfoComm 2008 in Las Vegas, Nevada June 18-20, 2008.

**Combine An Unlimited Number Of Multi-Screen Displays With The VWP-4050-B**

The impressive Video Wall Mount (VWP-4050-B) enables an unlimited number of matrices to be easily created. It delivers the ultimate ease-of-use with its ‘scissor-style’ arm design that provides access to any screen in the matrix without needing to dismantle the surrounding screens. Now it is easier than ever to create a video wall containing any number of screens, due to the cable access ports located in both the top and bottom of each mount that allows cables and cords to be run from screen to screen.

**VW-4050-B Perfect For Use In Video Wall Banners**

To create a static video wall, Peerless’ Video Wall Flat Screen Mount (VW-4050-B) holds flat panel screens in place, and is perfect for use in creating video wall banners and other displays that are less than two screens deep. The VW-4050-B comes equipped with cable access ports in the top and bottom of the mount, providing ample room to run any cables and cords to the surrounding screens.

These Video Wall Mounts will be shown in addition to Peerless’ comprehensive selection of mounting solutions at InfoComm 2008 in booth N5115 June 18-20, 2008. For more information about Peerless’ professional-grade mounting solutions, visit [www.peerlessmounts.com](http://www.peerlessmounts.com).

**About Peerless Industries, Inc.**

Peerless has designed and manufactured the most comprehensive line of audio/visual mounting solutions for over 40 years. Today, Peerless designs and manufactures mounts for current and emerging visual display technologies, including LCD and plasma flat panel displays, projectors, CRT televisions and other electronic equipment used in the commercial and consumer markets.
