New Peerless HD Flow Wireless Multimedia Kit Delivers HD Video and Audio to Any HDTV Anywhere in the Home without Cables

Eliminates high labor installation costs while enabling flexible HDTV placement

LAS VEGAS (January 6, 2011) – The new HD Flow Wireless Multimedia Kit (HDS100) from Peerless Industries is a simple solution for installing HDTVs and other displays with the freedom to stream Full HD 1080p 60Hz video and 5.1 channel Digital audio anywhere in the home – without drilling or running cables through the walls.

Featuring simple plug and play setup, HD Flow wirelessly connects devices such as Blu-ray®/DVD players, satellite/DVR/cable set top boxes, video game consoles, media servers, VHS players, laptop and PCs to HDTVs, digital TVs, projectors, monitors and even CRT TVs transmitting high-definition 1080p 60Hz resolution as well as analog.

With a reach of 131 feet, HD Flow provides a whole-home range with the ability to penetrate walls, ceilings and floors. This feature as well as the system's built-in IR blaster enable AV components to be placed out of sight in a cabinet or a closet, creating an uncluttered living and home-entertainment environment. Projectors can be mounted on the ceiling and TVs outdoors on the patio, deck or by the pool without the hassle and installation expense of cabling.

Operating in the open 5GHz band, HD Flow offers a completely robust connection. The Wireless HD transmitter provides the ability to broadcast its own integrated Wi-Fi (802.11n) signal with unnoticeable latency and without an additional wireless router, so that content can be streamed to as many as four Wireless HD Receivers (with the purchase of additional receiver units). This simplifies the process of installing multi-room or multi-display environments and provides the freedom to place additional displays in not-so-common areas in the home.

Other features include the ability to connect up to four source devices simultaneously, easily switch between sources using the remote control unit or pushbutton on the HD Flow transmitter, and switch to a second WiFi channel in the event of interference. The system is HDCP compliant and able to stream copy-protected content. It also features a USB port for upgrades and expansion options.

The HD Flow Wireless Multimedia Kit sells for \$388.98 (MSRP) and is available immediately. Peerless is the exclusive North American distributor. More information is available at www.hdfloor.com.

About Peerless Industries, Inc.

Peerless Industries is a 69-year old designer, manufacturer and distributor of A/V solutions including flat panel mounts, projector mounts, carts/stands, furniture, cables, screen cleaners and a full assortment of accessories. Peerless manufactures over 3,600 products that serve original equipment manufacturers, retailers and commercial installers in 25 vertical markets through direct salespeople and authorized distribution.
