Peerless Simplifies Digital Signage/Media Player Installations with New DST360 Display Mount Featuring Built-in Device Storage

One-Box Solution with Wall/Ceiling, Flat/Tilt Options

LAS VEGAS (February 23, 2010) – In a new one-piece mounting solution for digital displays that require media players, Peerless Industries has introduced a universal wall/ceiling mount with a media storage compartment integrated into the same housing. The new Peerless DST360 Flat/Tilt Universal Wall or Ceiling Mount with Computer/Media Controller Storage eliminates the need to install displays and media players separately while also increasing security and allowing the media device to be serviced or replaced without removing the display.

Built-in Media Storage

Designed for 26" to 60" flat panel displays used in applications requiring a media player to drive graphics, the DST360 features an enclosed space behind the display that can accommodate a computer or media controller up to 15" x 9" x 3." This eliminates the complications of attaching the media device externally or installing it in a wiring closet.

Easy Servicing & Security

The storage compartment folds open a full 20° from the bottom for easy access to and removal of the media device for maintenance or replacement. Internal cable management delivers a clutter-free side profile and rear view, built-in ventilation helps prevent device overheating, and security screws prevent tampering and theft.

Wall or Ceiling, Flat or Tilt

The DST360 offers ceiling or wall mounting options with either portrait or landscape orientation. Wall-mounted displays can sit flat or tilt forward up to 20°. Ceiling mount applications offer a 360° swivel for optimal positioning. A built-in adapter plate supports displays with VESA® 100 x 100, 200 x 100, and 200 x 200 mounting hole patterns. The mount also is compatible with all Peerless PLP-model VESA® mounting hole adapter plates. Hardware for installation to wood and metal studs, concrete or cinder block is

included. The mount can also be customized to enable displays to be mounted on both sides.

Availability

The Peerless DST360 Flat/Tilt Universal Wall or Ceiling Mount with Computer/Media Controller Storage is available immediately through Peerless' network of distributors and dealers. It is on display at Booth #1221 at the Digital Signage Expo 2010 that opens today at the Las Vegas Convention Center.
