## **New Peerless Mounting Accessory Stores Media Players Out of Sight, Fitting Snugly between Displays & Standard Pull-Out Mounts**

*DSX750 Eliminates Tape Attachment or Wiring Closet Installation*

LAS VEGAS (February 23, 2010) – Media players can now be quickly, securely and inconspicuously housed behind displays with Peerless Industries' new DSX750 Media Player Storage Accessory. Compatible with a number of Peerless swivel and articulating wall mounts, this media equipment enclosure eliminates the problems associated with securing the media device with tape or straps behind the display or installing it remotely in a wiring closet. It also offers built-in cable management, security and prop-open service access features critical for easy maintenance of digital signage applications.

### **First Non-Custom Product in Its Class**

Designed to meet the demand for faster and easier deployment of networked digital signage systems, the DSX750 is the first standard add-on media device storage solution for pull-out articulating mounts. The accessory box fits snugly between the display and the mounting plate, enabling the media player and display to be tightly coupled for a neat appearance as well as one-stop installation and access. It attaches to the installer's choice of Peerless FPS-1000, SP850, SA745, SA750, SA760 or SA770 mounting products, and holds computers and media controllers up to 9.50" x 7.75" x 2.5".

### **Easy & Secure Installation**

The DSX750 unit bolts directly to the mounting plate on the wall side and to 100x100, 200x100, 100x200 or 200x200mm VESA® mounting hole patterns on the display back, or with an accessory adapter plate for larger mounting hole patterns. Displays up to 150 pounds can be hung in either landscape or portrait orientation.

A nylon belt inside the enclosure holds the media player safely in place, while security screws prevent tampering and theft. Cables are managed within the unit and can be routed to the display or the wall out from any of the four sides of the housing unit.

## **Prop-Open Service Access**

A special arm within the DSX750 enables the unit to prop open for easy servicing of the media player or display without taking down the display or disassembling the mount. Simply loosen the screws on the bottom left and right sides of the box, lift the bottom of the display, and the arm automatically drops into place to support the display unit. When finished, collapse the arm manually and tighten the screws to restore the display and equipment to its original position.

## **Availability**

The Peerless DSX750 Media Player Storage Accessory is available now through Peerless' network of distributors and dealers. It is on display at Booth #1221 at the Digital Signage Expo 2010 that opens today at the Las Vegas Convention Center.

## **About Peerless Industries, Inc.**

Peerless Industries is a 68-year old designer, manufacturer and distributor of A/V solutions including flat panel mounts, projector mounts, carts/stands, furniture, cables, screen cleaners and a full assortment of accessories. Peerless manufactures over 3,600 products that serve original equipment manufacturers, retailers and commercial installers in 25 vertical markets through direct salespeople and authorized distribution.
