Peerless Introduces Market's Most Advanced Video Wall Mount: Custom Spacers, 8-Way No-Tool Adjustment & Prop-Open Servicing

DS-VW760 Enables Precise Alignment of Multiple Screens, Easy Service Access

LAS VEGAS (June 9, 2010) – To expedite installation of video walls, Peerless Industries, Inc. will display at InfoComm 2010 the DS-VW760 Full-Service Video Wall Mount featuring customized wall plate spacers, eight-point tool-less adjustment, and prop-open service access with top or bottom release. The modular-style mount saves time by enabling multiple 40" to 65" flat panel displays to be precisely aligned without measuring and quickly serviced without dismantling the entire wall.

No Calculations or Guesswork

Designed to support any display configuration from 2x2 to 3x2, 4x4 and beyond, the DS-VW760 ensures precision placement of multiple displays by providing wall plate spacers that have been customized to the dimensions of specific digital display models. Simply install the first mount and align the spacers on the wall to position the next one, eliminating guesswork and on-site calculations as well as gaps between display units.

The mount also delivers a snug fit on the attachment point to the display's mounting hole pattern, ensuring that each display as it is hung in succession is aligned at the same point. Integrated cable management with cable tie-backs further simplifies installation.

Tool-less Micro-Adjustment

The DS-VW760 also offers more micro-adjustability with less work than any competitive product. Display positioning can be fine-tuned at eight different points, including up-down vertical, left-right horizontal and in-out tilt of the whole display as well as up-down roll at the display corners. Quick-turn adjustment knobs save time and facilitate proper placement by eliminating the need for mechanical tool-based adjustment. The wall plate itself can also be adjusted left, right, up and down to accommodate different stud and wall plate mounting location options.

Easy Pull-Down Service Access

A pull-out/prop-open mechanism on each mount allows any display in the video wall matrix to be accessed individually from either the top or bottom for display, cabling or

component service. When pulled from the top or pushed from the bottom, a quick-release lever will provide easy access to the back of the selected display. The unit will stay in the open position with an additional tilt option to provide ample room for technicians' hands. When finished, simply push the display back into place and an audible click will indicate when the mount has secured into the proper position.

Availability

The Peerless DS-VW760 Full-Service Video Wall Mount became available in May through Peerless' network of distributors and dealers. It is on display at Booth C5842 at InfoComm 2010 that opens June 5 at the Las Vegas Convention Center.

About Peerless Industries, Inc.

Peerless Industries is a 68-year old designer, manufacturer and distributor of A/V solutions including flat panel mounts, projector mounts, carts/stands, furniture, cables, screen cleaners and a full assortment of accessories.
