

Faster, More Precise Projector Image Alignment Now Available with New Arakno Gear-Based Projector Mounts from Peerless

Aligns & Adjusts with a Turn of a Knob; Expands Industry's Only Gear Mount Line

CHICAGO (November 19, 2009) – In another advance in installer-friendly design, Peerless Industries has released a new line of gear-based ceiling projector mounts that enable images on multimedia projectors to be precisely aligned simply by turning two knobs. The new Arakno® Projector Mounts utilize exclusive gearing technology to deliver the industry's fastest, most exact and only tool-less image alignment, with the added benefit of the fullest range of motion on the market and a new no-pull knob mechanism for easy adjustment.

No Adjustment Screws, No Micro-Adjustments

Like Peerless' PRG Precision Gear Projector Mounts, the new Arakno series expedites image alignment by eliminating the adjustment screws and repeated micro-adjustments usually required to achieve the right positioning. The gearing inside the mount makes it as easy to dial in the desired alignment as it is to focus binoculars – either by hand or optionally with the use of an Allen wrench. Once set, the gears accurately hold image position, virtually eliminating sag or drift.

Extra-Wide Adjustability & Easy-Turn Knobs

To accommodate any ceiling height or mount location, the new Arakno mounts boost range of motion to a maximum +29°/-45° tilt and roll as well as a full 360° swivel. Special knobs with easy-grip design turn like radio dials, eliminating the need to engage adjustment handles by extending and retracting. A quick-release mechanism enables projectors to be disconnected and reconnected with a single screw for servicing.

Holds Projectors Up to 100 Lbs.

Peerless' Arakno Projector Mounts come in two models: the PAG-UNV for projectors up to 50 pounds (MSRP \$229) and the heavy-duty PAG-UNV-HD (MSRP \$250) for projectors up to 100 pounds. Each all-in-one-box package includes the mount, a ceiling plate, a threaded cable management connector, and Peerless' patent-pending Spider® Universal Adapter Plate with expanding legs that enable the mounts to fit nearly all projectors.

About Peerless Industries, Inc.

Peerless Industries is a 68-year old designer, manufacturer and distributor of A/V solutions including flat panel mounts, projector mounts, carts/stands, furniture, cables, screen cleaners and a full assortment of accessories. Peerless manufactures over 3,600 products that serve original equipment manufacturers, retailers and commercial installers in 25 vertical markets through direct salespeople and authorized distribution.
